

One-Year MSM Course

Apply to the medical school

5 reasons to study in the Czech Republic

High quality education

Graduates of medical and biomedical faculties of Czech universities are known for their professionalism and are always in demand in the labor market around the world.

Speciality in demand

The Czech hospitals need to increase the number of employees due to the migration of Czech doctors to Germany. Medical school graduates find work instantly after graduation.

Practical knowledge

Czech universities closely cooperate with the largest Czech and world's clinics, where students have practical classes during their studies.

Free education

Studying in the Czech state universities in the Czech language is completely free, even for foreign students.

International environment

Students from all over the world come to Prague for educational purposes. With MSM course you will be able to make friends from different countries and introduce yourself to different cultures

Mezinárodní Svaz Mládeže
The International Union of Youth
